MEMORANDUM FOR: SA/DD
THROUGH : Chief CB *JS*
SUBJECT : CB Monthly Report, Item IV.E
REFERENCE : A. CB Memo of 10 Feb 1960, Explanation of Quarterly Report
B. My Memo of 22 March 1960, CB Monthly Report, Item IV.E,
Nodex Percentages (attached)

1. Item IV.E of Reference A explains Nodex percentages: "Computed by comparing the number of documents nodexed (including Nodex-M's) and the number of documents coded. Does not take into consideration TS, direct distribution, and standard distribution. The figure is thus an indication of the amount nodexed of those documents usually considered for indexing. It is not an indication of the amount nodexed of all documents received."

2. Reference B discusses an alternate method of computation, which we have not used.
